JORDAN WILLIAM CHAMBERLAIN

DESIGNER. DIGITAL CREATIVE & FRONT END DEVELOPER

ABOUT ME

I'm a designer with a background in illustration and I'm passionate about creative problem solving.

For the past four years I've worked in-house for a technology startup with big messaging problems. That challenge excited me, but I've recently moved on in the hopes of finding a more diverse, collaborative position in New York City.

My work experience is balanced by freelance, which has been a major part of my professional career for the past seven years. As a result, I'm very familiar with multi-tasking, disparate projects and tight deadlines. I thrive under pressure, and I'd like to be part of a team that approaches daily challenges with attention to solid messaging, design principles and detail.

In short, I want to work with like-minded creatives to help forward-thinking brands meet their potential.

I'm a hard worker and a fast learner and I want to put my skills to work in a creative community that demands the best.

Regards,
